To: all AMPASA customers

Subject: RoHS compliance Letter

Date: April 26, 2006

Azkoyen Medios de Pago (AMPASA), hereby certifies that all products included below will be in compliance with European Directives RoHS (Restriction of Hazardous Substances) & WEEE (Waste Electrical & Electronic Equipment) starting May 1, 2006.

- ✓ Change givers series: Exactor / Precision, AN8000
- ✓ Hopper U, Discriminator
- ✓ Validators series: L66S, L86, modular range
- ✓ Sorters, Cradles, Frontplates, Face plates

After July 1, 2006 most of the AMPASA products will comply with the requirements of the EU directive, as shown below:

- ✓ Tempus
- ✓ Validator series: old 'L' & 'N' series
- ✓ Combo T

AMPASA is now buying electronic components and circuits, plastics, screws and plate that are in compliance with the directives listed above; however there are some components that won't be available from our suppliers until the deadline on July 1, 2006.

AMPASA is in the process of phasing out those components that are not in compliance with the RoHS directive and depleting all non-conforming inventories. This will be accomplished by the RoHS deadline.

There are certain products, such as Hopper E that will not be compliant since they are in the process of obsolescence. Please contact your sales manager for an appropriate alternative

If you should have any questions please feel free to contact our sales department
